DETAILED ACTION

1. The affidavit disqualifying Chen (2003/0152348) as Prior Art under 35 U.S.C. 102(e) has been received and is sufficient to disqualify the reference.

Response to Arguments

2. Applicant's arguments, see the amendment, filed September 19, 2005, with respect to the rejections of claim 1-16 have been fully considered and are persuasive. The rejections of claims 1-16 have been withdrawn.

Applicant persuasively argue "Hart neither teaches nor suggests a plurality of varying spin reversal distances occurring within a spin repeat distance as required by the presently claimed invention". (See the first full paragraph on page 7, and the preceding argument on pages 6 and 7) Applicant is also correct in stating that neither Hart, Cocchini, or Conradi teach using a plurality of spin reversal distances as viewed in context of the entirety of claims 1 and 11 and in light of the specification.

Allowable Subject Matter

3. Claims 1-16 are allowed. The following is an examiner's statement of reasons for allowance. Independent claims 1 and 11 are allowed because the prior art of record fails to teach or fairly suggest an apparatus, method, or means for, an optical fiber with a beat length of at least 0.5 meters and a plurality of varying spin reversal distances occurring within the spin repeat distance, wherein the plurality varying spin reversal distances comprises a minimum spin

reversal distance and a maximum spin reversal distance; in combination with the other recited limitations in the claim. Claims 2-10 and 12-16 are allowable by virtue of their dependence on claims 1 and 11, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
